# BRITE & TIGHT CURES

*No Mix, No Fail Herring Brine  
Just Open & Pour*

## ● HERRING CURE

Salmon anglers have long known that brined herring holds up better than herring that have not been brined; especially frozen herring. Mike's Brite & Tight makes brining herring as easy as unscrewing the cap, pouring the cure into a container or zip lock bag and soaking your herring overnight. What could be more simple? Not only does Mike's Brite & Tight brine your herring so they last longer and are brighter so they attract salmon better, but they have taken it a step further by adding dye and scent to further improve the performance of your herring.

Brite & Tight is UV enhanced which adds even greater visibility to your brined baits. Particularly in low light conditions, UV provides an important advantage that results in more fish!

Mike's Brite & Tight is not just for herring. Use it on shrimp, prawns, anchovies, minnows, crayfish, alewife and more!

This easy, no mix cure makes great prepared bait every time that will give you the edge professional anglers depend on in their businesses. **Cure it right, use Brite & Tight!**  
31 oz. bottle

*"The herring brine is awesome and I use it for curing up herring and anchovies for salmon trolling, sardines for plug wraps and striper fishing --and various minnows for trout trolling"*

**Tip:** Go prepared. Some days salmon want smaller profile baits, other days larger baits work better. Brine up green label and blue or even purple label herring (very large) using different dye colors. Chartreuse, for example can be very effective in deep water or under low light conditions. Blue dye has been a favorite among salmon anglers for decades and is still a popular choice. Sometimes, particularly under bright skies, natural or red works best. Experiment with bait size and colors to optimize your efforts.

## ● CLUSTER/SKEIN CURE

Brite & Tight Cluster/Skein Cure takes the guesswork out of curing eggs. Now everyone can produce premium cured eggs without the hassle or worry associated with most powdered cures. Easy-to-use, Brite & Tight produces cured skeins and clusters that look fantastic and work as well, and in many cases, better than most powdered cures that require multiple steps and painstaking care to achieve the same results. It's a one-step process and you're done! 31 oz. bottle

## ● SPAWN SAC CURE

Similar to the Cluster/Skein Cure, the Brite & Tight Spawn Sac and Single Egg Formula is especially designed to produce professional results for single eggs. The easy-to-use, one-step process takes the mystery out of producing exceptional eggs that catch salmon, steelhead and trout. Keeps cured eggs fresh for months! Brite & Tight rejuvenates old cured or frozen eggs or spawn sacs. 16 oz. bottle
